(B) Conditions Of Reservations

(1) A reservation for space on a given flight is valid when the availability and allocation of such space is confirmed by a reservation agent of the carrier, and entered in the carrier's reservation system. Subject to payment or satisfactory credit arrangement, a validated ticket will be issued by the carrier indicating such confirmed space, provided passenger applies to carrier for such ticket at least 60 minutes prior to the scheduled departure time of a flight. Such reservation for space is subject to cancellation by the carrier without notice if the passenger has not purchased a validated ticket indicating confirmed seat(s) at least sixty (60) minutes before scheduled departure of the flight.

Exception 1: If the passenger agrees to apply to the carrier or agent of the carrier for a validated ticket indicating such reserved space at a time earlier than the time limit specified above, such earlier time limit will be entered into the carrier's reservations system. The reservation for space of such passenger is subject to cancellation by the carrier without notice if the passenger has not applied to the carrier or agent of the carrier for a validated ticket specifying thereon the confirmed reserved space prior to the agreed time in advance of the scheduled departure of the flight to which such reservation applies.

Exception 2: In the event of a termination of an interline traffic agreement between

AA and another carrier, AA will honor any reservation for travel on AA made by such other carrier prior to termination provided AA issues the ticket if such ticket was not issued prior to termination.

- (3) Overbooking
Carrier may accept reservations of space for specific flights in excess of available space on board the aircraft. The number of excess reservations planned by the carrier for a particular flight is based upon the anticipated booking pattern for such flight. The determination of this pattern takes into consideration current conditions which may affect the expected utilization of space on the flight as well as historical factors such as the rate of late cancellations for the flight, failure of persons with confirmed reservations to show for the flight and the absence of any record for

Rule 87 Denied Boarding Compensation

(b) Request for volunteers

AA will request passengers who are willing to do so, to voluntarily relinquish their confirmed reserved space in exchange for compensation in an amount determined by AA. If a passenger is asked to volunteer, AA will not later deny boarding to that passenger involuntarily unless that passenger was informed at the time he was asked to volunteer that there was a possibility of being denied boarding involuntarily and of the amount of compensation to which he would have been entitled in that event. The request for volunteers and the selection of such persons to be denied space shall be in a manner determined solely by AA.

Note: In exchange for voluntarily relinquishing confirmed space, AA may, at its option, compensate the passenger with credit valid for the purchase of transportation on AA in lieu of monetary compensation. The boarding priorities are provided below.

Note: The boarding priorities as presented below will appear in the notice provided to passengers denied boarding (see paragraph (f) below).

Passengers with the highest priority, as listed below, will be the last to be involuntarily denied boarding. Passengers within any category will be boarded in the order of presenting themselves for check-in. Check-in occurs when passenger presents his ticket for issuance of a boarding pass at any point(s) designated by the airline for such purpose. - (1) AA will transport the passenger without stopover on its next flight on which space is available at no additional cost to the passenger regardless of class of service.
 - (2) If the carrier causing such delay is unable to provide onward transportation acceptable to the passenger, any other carrier or combination of carriers, at the request of the passenger, will transport the passenger without stopover on its (their) next flight(s) in the same class of service as the passenger's original outbound flight, or if space is available on a flight(s) of a different class of service acceptable to the passenger, such flight(s) will be used without stopover at no additional cost to the passenger only if it (they) will provide an earlier arrival at the passenger's destination, next stopover point, or transfer point.
- (E) Compensation for involuntary denied boarding

in addition to providing transportation as described in paragraph (D) above, when the passenger who is delayed has not voluntarily relinquished confirmed reserved space in accordance with provisions in paragraph (b) above, the carrier causing the delay will compensate the delayed passenger for the carrier's failure to provide confirmed space. - (a) The passenger holding a ticket for confirmed space must present himself for carriage at the appropriate time and place, having complied fully with the carrier's requirements as to ticketing, check-in, and reconfirmation procedures and having met all requirements for acceptance for transportation published in carrier's tariff.
- (b) The flight for which the passenger holds confirmed reserved space must be unable to accommodate the passenger and departs without him.

Exception 1: The passenger will not be eligible for compensation if the flight on which he holds confirmed reserved space is unable to accommodate him because of substitution of equipment of a lesser capacity when required by operational or safety reasons.

Exception 2: The passenger will not be eligible for compensation if he is offered accommodations or is seated in a section of the aircraft other than that specified on his ticket at no extra charge. If a passenger is seated in a section for which a lower fare applies the passenger shall be entitled to an appropriate refund.

Exception 3: The passenger will not be eligible for compensation if his reservation has been cancelled pursuant to rule 60 (f) (reservations-check-in time limits).

Exception 4: employees of the carrier or of other carriers traveling on a reduced rate basis. These employees are not eligible for denied boarding compensation.

Exception 5: The passenger will not be eligible for denied boarding compensation if AA arranges comparable air transportation or other transportation used by the passenger at no extra cost to the passenger, that at the time such arrangements are made is planned to arrive at the passenger's next

stopover or, if none, final destination within one hour after the scheduled arrival time of the passenger's original flight or flights.

- (2) Amount of compensation
Subject to provisions of paragraph (1) above, AA will tender liquidated damages in the amount of 200 percent of the sum of the values of the passenger's remaining flight coupons of the ticket to the passenger's next stopover, or if none, to his destination, but not less than CAD 75.00/USD 75.00 and not more than CAD 800.00/USD 800.00. However, the compensation shall be 50 percent of the amount described above, but not less than CAD 37.50/USD 37.50 or more than CAD 400.00/USD 400.00 if the carrier arranges for comparable air transportation, or for other transportation that is accepted. That is, transportation used by the passenger, which, at the time either arrangement is made, is planned to arrive at the airport of the passenger's next stopover, or if none, at the airport of the passenger's destination earlier than or not later than four hours after the planned arrival at the airport of the passenger's next stopover, or if none, at the airport of the passenger's destination, of the flight on which the passenger holds a confirmed reservation.

Exception: On American Eagle with 60 or less seats, the total value of the coupon in question will be refunded (not to exceed CAD 150.00/USD 100.00 and the passenger will be transported free of charge, on the next available American Eagle flight to his/her destination or next point of stopover/connection. The total value of the coupon (not to exceed CAD 150.00/USD 100.00 will be refunded without regard to the availability of service or the passenger's arrival time on that service at his/her destination or next point of stopover/connection.

Note 1: If the offer of compensation is made by the carrier and accepted by the passenger, such payment will constitute full compensation for all actual or anticipatory damages incurred or to be incurred by the passenger as a result of carrier's failure to provide passenger with confirmed reserved space.

Note 2: The carrier may compensate the passenger with credit valid for transportation on AA in lieu of monetary compensation. The offer of free transportation would be equal to or greater than the monetary compensation due. The credit voucher is nontransferable, has no refund value, and

may be voluntarily rerouted and reissued by the issuing carrier only.

Exception: (Applicable to passengers boarding flights in the U.S.A.) the passenger may decline the transportation benefit and receive the cash payment.

- (3) Time of offer of compensation
The offer of compensation will be made by the carrier on the day and at the place where the failure to provide confirmed reserved space occurs, and, if accepted, will be receipted for by the passenger. Provided, however, that when the carrier arranges, for the passenger's convenience, alternate means of transportation that departs prior to the time the offer can be made to the passenger, the offer shall be made by mail or other means within 24 hours after the time the failure occurs.

(F) Notice provided passengers

The following written notice shall be provided all passengers who are denied boarding involuntarily on flights on which they hold confirmed reserved space. blanks that appear in parentheses in the notice below will be completed in the actual notice provided passengers, with specific boarding priorities.

Note: For the purpose of this rule, specific boarding priorities are provided in paragraph (c) above.

- (1) Compensation for denied boarding
- (a) (Applicable for flights originating in the U.S.A.) if you have been denied a reserved seat on American Airlines, you are probably entitled to monetary compensation. This notice explains the airline's obligations and the passenger's rights in the case of an oversold flight, in accordance with regulations of the U.S. Department of Transportation.
 - (b) (Applicable for flights originating in Canada) if you have been denied a reserved seat on American Airlines, you are probably entitled to monetary compensation. This notice explains the airline's obligations and the passenger's rights in the case of an oversold flight, in accordance with regulations of the Canadian transport commission.
- (2) Volunteers and boarding priorities
If a flight is oversold (more passengers hold confirmed reservations than there are seats available), no one may be denied boarding against his will until airline personnel first ask for volunteers who will give up their reservations willingly, in exchange for a payment of the airline's choosing. If there are not enough volunteers, other passengers may be denied boarding involuntarily, in accordance with the following boarding priority of American Airlines:
- (3) Compensation for involuntary denied boarding

if you are denied boarding involuntarily, you are entitled to a payment of "denied boarding compensation" from the airline unless (1) you have not fully complied with the airline's ticketing, check-in, and reconfirmation requirements, or you are not acceptable for transportation under the airline's usual rules and practices; or (2) you are denied boarding because the flight is cancelled; or (3) you are denied boarding because a smaller capacity aircraft was substituted for safety or operational reasons; or (4) you are offered accommodations in a section of the aircraft other than that specified in your ticket, at no extra charge. (a passenger seated in a section for which a lower fare is charged must be given an appropriate refund.); or (5) the airline is able to place you on another flight or flights that are planned to reach your destination within one hour of the scheduled arrival of your original flight.

- (4) Amount of denied boarding compensation passengers who are eligible for denied boarding compensation must be offered a payment equal to the sum of the face values of their ticket coupons, with a CAD 37.50/USD 37.50 minimum and CAD 400.00/USD 400.00 maximum. However, if the airline cannot arrange "alternate transportation" (see below) for the passenger, the compensation is doubled (CAD 75.00/USD 75.00 minimum, CAD 800.00/USD 800.00 maximum). The "value" of a ticket coupon is the one way fare for the flight shown on the coupon, including any surcharge and air transportation tax, minus any applicable discount. All flight coupons, including connecting flights, to the passenger's destination or first 4-hour stopover are used to compute the compensation. "alternate transportation" is air transportation provided by an airline licensed by the D.O.T. or other transportation used by the passenger which, at the time the arrangement is made, is planned to arrive at the passenger's next scheduled stopover (of 4 hours or longer) or destination no later than 4 hours after the passenger's originally scheduled arrival time.

Exception: On American Eagle with 60 or less seats, the total value of the coupon in question will be refunded (not to exceed CAD 150.00/USD 100.00) and the passenger will be transported free of charge, on the next available American Eagle flight to his/her destination or next point of stopover/connection. the total value of the coupon (not to exceed CAD 150.00/USD 100.00) will be refunded without regard to the availability of service or the passenger's arrival time on that

- service at his/her destination or next point of stopover/connection.
- (5) Method of payment
The airline must give each passenger who qualifies for denied boarding compensation, a payment by check or draft for the amount specified above, on the day and place the involuntary denied boarding occurs. However, if the airline arranges alternate transportation for the passenger's convenience that departs before the payment can be made, the payment will be sent to the passenger within 24 hours. The air carrier may offer free tickets in place of the cash payment. Passengers boarding flights in the U.S.A. may insist on cash payment. All passengers may refuse compensation and bring private legal action.
- (6) Passenger's options
Acceptance of the compensation (by endorsing the check or draft within 30 days) relieves American Airlines from any further liability to the passenger caused by its failure to honor the confirmed reservation. However, the passenger may decline the payment and seek to recover damages in a court of law or in some other manner.

- (3) AA shall make all or any individual refunds through its general accounting offices of regional sales or accounting offices, and require prior written applications for refunds to be prepared by passengers on special forms furnished by AA.

(B) Currency

All refunds will be subject to government laws, rules, regulations, or orders of the country in which the ticket was originally purchased and of the country in which the refund is being made.

Note: (Applicable to tickets sold in Venezuela) any full or partial refund of a ticket purchased in Venezuela will only be accepted at the AA passenger refund office or at the original issuing location in Venezuela. Tickets purchased in VEF currency may only be refunded in VEF currency.

- (1) Voluntary refunds of tickets, miscellaneous charges orders, or deposit receipts purchased in currency other than U.S. dollars shall be made in currency used for such purpose, and in country where such purchase was made.
- (2) Voluntary refunds of tickets, miscellaneous charges orders, or deposit receipts purchased in U.S. dollars may be made in U.S. dollars or local currency in any country provided such refund is not prohibited by local governmental exchange control regulations at point of refund.
- (3) Involuntary refunds of tickets, miscellaneous charges orders, or deposit receipts shall be made in the currency used for such purchase and in the country where such purchase was made, whenever possible. However, U.S. dollars refunds or refunds in the currency of the country where the

involuntary refund is necessary may be made on request of passenger provided refund in such currency is not prohibited by local governmental exchange control regulations.

- (4) Refunds will be made in the currency in which the fare was paid, or, in lawful currency of the country of the carrier making the refund or of the country where the refund is made or in the currency of the country in which the ticket was purchased, in an amount equivalent to the amount due in the currency in which the fare or fares for the flight covered by the ticket as originally issued was collected.

Note: Despite the foregoing provisions, AA will reserve the right to refuse to make any refund authorized by this tariff in a currency other than that used in the purchase of the ticket to be refunded or at a place other than that at which payment for such ticket was made.

- (c) Person to whom refund is made

- (2) If, at the time of purchase, the purchaser designates on the ticket another person to whom refund shall be made, refund will be made to the person so designated. A refund made in accordance

with this procedure to a person representing himself as the person so designated in the ticket, exchange order or miscellaneous charges order will be deemed a valid refund and AA will not be liable to the true passenger for another refund.

- (3) if, at the time of application for refund, evidence is submitted that a company purchased the ticket on behalf of its employee or the travel agent has made refund to its client, such refund will be made directly to the employee's company or the travel agent.

(D) Involuntary refunds

- (1) For the purpose of this paragraph, the term "involuntary refund" shall mean any refund made in the event the passenger is prevented from using the carriage provided for in his/her ticket because of cancellation of flight, inability of AA to provide previously confirmed space,

carry

under conditions prescribed in "acceptance of children" provisions of rule 25 (refusal to transport-limitations of carrier).

- (2) Amount of involuntary refunds

- (a) When no portion of the trip has been made, the amount of refund will be an amount equal to the fare and charges applicable to the ticket issued to the passenger.
 - (b) When a portion of the trip has been made, the amount of refund will be computed as follows:
 - (i) Either an amount equal to the one way fare less the same rate of discount, if any, that was applied in computing the original one way fare (or on round trip or circle trip tickets, one half of the round trip fare) and charges applicable to the unused transportation from the point of termination to the destination or stopover point named on the ticket or to the point at which transportation is to be resumed, via:
 - (aa) The routing specified on the ticket, if the point of termination was on such routing; or
 - (bb) The routing of any carrier operating between such points, if the point of termination was not on the routing specified on the ticket; in such case the amount of refund will be based on the lowest fares applicable between such points; or
 - (ii) The difference between the fare paid and the fare for the transportation used,

whichever is higher.

Exception 1: AA will make no refund:

 - (b) For round trip, circle trip or open jaw tickets: the difference between 50 percent of the round trip fare for the higher class of service and 50 percent of the round trip fare for the lower class of service between the points where the lower class of service is used.

except as otherwise provided in rule 25 (refusal to transport - limitations of carrier); provided, however, that the passenger will be required to pay for any communications pertaining to his own arrangements necessitated by such involuntary cancellation.

(E) Voluntary refunds

- (1) The term "voluntary refund," for the purpose of this paragraph, shall mean any refund of a ticket or portion thereof other than an involuntary refund as defined in paragraph (d) above.

All taxes and fees imposed by the United States government fall within this category. Taxes or fees will be refunded if the airline's obligation to remit the tax or fee depends upon use of the ticket for travel.
 - (f) When the refunding of any portion of a ticket would result in the use of such ticket between any points where the carriage of traffic is prohibited, the refund, if any, will be determined as if such ticket had been used to a point beyond which would not result in the violation of carrier's operating rights or privileges. The passenger will be refunded the difference between the fare paid from the point of origin to such farther point and the total fare paid, less any applicable charges.
 - (g) A penalty for voluntary cancellation shall not apply and the total amount paid shall be

refunded if such cancellation is made after an increase in the fare is made applicable between the time of the initial payment and the date of travel.

 - (3) The foregoing provisions for lost tickets shall also apply to lost exchange orders, deposit receipts, and excess baggage tickets.
 - (4) Service charge

Unless otherwise provided for in specific fare types, AA will impose a service charge in U.S. or Canadian dollars as indicated in the table below or the equivalent in other than U.S. or Canadian dollars converted by the bankers' buying rate, per ticket, for handling such request for refund or replacement of a lost ticket or exchange order.

- (a) The carrier whose designator code is identified on the first segment of the passenger's interline ticket will be known as the selecting carrier.
- (b) Any carrier who is identified as providing interline transportation to the passenger by virtue of the passenger's ticket will be known as a participating carrier.

The carrier identified by means of a) or b) will be known as the selected carrier.

- (4) Baggage rule application by participating carrier

The disclosed information will reflect the baggage rules of the selected carrier.

Rule 130 Fares

Effective November 9 for travel to/from the US.

(A) General

The mileage routings or specified routings contained in this tariff shall apply only when transportation is via the Atlantic Ocean/Pacific Ocean or wholly within the Western Hemisphere on through AA fare components, or on agreed industry fares when AA performs governing carriage as described in Rule 5 of this tariff, unless otherwise prohibited by this tariff. Fares apply only for carriage from the airport at the point of origin to the airport at the point of destination, and do not include ground transfer service between airports and city centers, except where Rule 30 specifically provides that such ground transfer service will be furnished without additional charge.

(B) Fare construction definitions

(1) Round Trip

Round trip means travel from one point and return to the same point comprised of no more than two fare components, for which the same mileage surcharge and/or higher intermediate point city pair applies to both the outbound and return fare components.

Class of service, seasonality, midweek and weekend fare differences are not considered in the application of this definition. This definition does not apply to around the world journeys.

(2) Circle Trip

Circle trip means travel from a point and return to the same point by a continuously charged air route which does not qualify under the definition of Round Trip above; provided that, where no reasonable direct scheduled air route is available between two points, a break in the circle may be traveled by any other means without prejudice to the circle trip.

(3) One Way Trip

One way trip is any journey which, for fare calculation purposes, is not a complete round or circle trip entirely by air.

(4) Around the World Trips

Around the world trips are circle trips which apply to travel from one point and return to the same point which involves only one crossing of the Atlantic Ocean and only one crossing of the Pacific Ocean.

(5) Open Jaw Trips

An open jaw trip is travel which is essentially of a round trip nature, except that:

- (a) For Single Open Jaw - the outward point of arrival and the inward point of departure are not the same, or the

outward point of departure and the inward point of arrival are not the same.

- (b) For Double Open Jaw - the outward point of arrival and the inward point of departure are not the same, and the outward point of departure and the inward point of arrival are not the same.

Note: If a rule states simply "open jaw", it permits a single or a double open jaw.

- (6) Side Trip
Side means a round trip, circle trip, one way or open jaw journey to and or from the same en-route point of a fare component. When a fare for a side trip is charged separately, apply the provisions of fares for round trips, circle trips, one way and open jaw trips.
- (7) Special Area Definitions
Each of the following areas is considered one country, for the purpose of fare construction;
(a) Canada and U.S.A.
(b) Denmark, Norway and Sweden
- (C) Applicable fares
- (1) Published applicable fares between two points take precedence over any combination of fares in the same class of service that produces a higher total fare. A published fare includes a fare obtained by combining an applicable published arbitrary with a published international fare.
- (2) Fares are applicable in the direction of travel except when more than one fare component is involved. For any fare component which terminates in the country of origin, the fare applicable to such fare component from the country of origin must be charged. For round trip, circle trip, and/or open jaw fares combined end-on-end with other fares, the country from which such fare(s) is charged is considered the country of origin. For a fare(s) charged on side trips, the point of fare interruption is considered as the point of origin for determining the fare directionality of the separately charged side trip components.
- Exception 1: For fare components between the U.S.A./Canada or between Denmark/Norway/ Sweden returning to the country of origin, the fare from country of origin shall apply.
- Exception 2: (Applicable to Open Jaw normal and special fares) For tickets originating and terminating in Europe (except for tickets with travel wholly within Europe), when the open jaw is between countries in Europe, the applicable fare for

the last fare component into the country of destination shall be the fare applicable from the country of destination.

EXAMPLE: AMS-WAS-MAD

FARE CONSTRUCTION:

AMS-WAS 1/2 RT PEX FARE

MAD-WAS 1/2 RT PEX FARE

- (3) Directional fares may be used in the construction of circle trip fares. However, for the last fare component into the country of origin, the fare applicable to such fare component must be used.
- (4) All published fares governed by this tariff and all fares constructed in accordance with this tariff are applicable only when in compliance with all the provisions governing travel as stated herein. If a diagrammatic or linear routing is specified in connection with a fare, such routing must be observed for that portion of the transportation covered by that fare. Mileage routings (see Maximum Permitted Mileage Tariff No. MPM-1, C.A.B. No. 424, NTA(A) No. 239) are applied to any published or constructed fare.
- (5) The fare paid is applicable only when international travel commences in the country of the point of origin shown on the ticket, i.e. if international travel actually commences outside the country of the ticketed point of origin, the fare must be recalculated from the point where international travel actually began. For example, if a ticket is purchased at the fare for travel Athens-Frankfurt-New York, and the passenger commences travel in Frankfurt instead of Athens, the fare must be recalculated at the Frankfurt-New York level.
- (6) When a PU contains fare components for which different percentages apply, the fare for each percentage component shall be calculated using the percentage applicable to that component. Fare construction checks (HIP, CTM, etc.) shall be made using the levels which result for applying such percentage.
Example
Journey A-B-C-D Children's fare:
A-C 50% of the adult fare.
A-D 50% of the adult fare.
B-C 67% of the adult fare.
B-D 67% of the adult fare.
Calculate amounts resulting from the application of the above percentages. Using these amounts apply minimum fares checks (such as HIP/CTM checks)
- (7) The fare for a fare component shall be the lower amount which can be determined according to:
 - (a) Mileage System:
The application of the Mileage System, as described in Section (D)(4) and following in this rule, or

- (b) Lowest Combination of Fares Principle:
The lowest combination of sector fares over intermediate point(s) on the itinerary, subject to applicable minimum fare checks. Fares constructed by the Lowest Combination of Fares Principle may utilize through mileage over any combination of sector fares used, even though such fares are shown separately, provided that all transportation is via the fare construction point(s).
- (D) Construction of fares
 - (1) Combinations
Fares may be combined with other fares, provided that such fares permit the combination.
 - (a) Round Trips:
The fare for a round trip is the round trip fare published for the desired routing and class of service charged. If no round trip fare is published, the applicable fare is the sum of the one way fares published for the desired routing and class of service used. When transportation is partially via a fares governed by this tariff and partially via a fares published in other tariffs, 50 percent of a round trip fare published in other tariffs will be used to construct a round trip fare provided that:
 - (i) fares which, by their terms, are not combinable with other fares, must not be used in the construction of round trip fares;
 - (ii) No part of the round trip is via the services of a nonscheduled carrier or on a charter or military flight.
 - (b) Circle Trips:
The fare for a circle trip is:
 - (i) The sum of 50 percent of the applicable round trip fares for the class of service charged for the respective sections of the itinerary from the point of origin via the route of travel to destination that produces the lowest fare of the class of service used. If no round trip fare is published, the applicable fare is the sum of the one way fares published for the desired routing and class of service charged, and/or;
 - (ii) When transportation is partially via a fares governed by this tariff and partially via a fares published in other tariffs, 50 percent of a round trip fare governed by this tariff may be combined with 50 percent of a round trip fare published in other tariffs to construct a circle trip fare provided that:
 - (aa) fares which, by their own terms, are not combinable with other

- fares must not be used in the construction of circle trip fares;
- (bb) the most restrictive fare rule provision, as listed in rule 2 permitted combination (9) applicable to any fare used in the construction shall apply to the entire trip;
 - (cc) no part of the circle trip is via the services of a non-scheduled carrier or on a charter or military flight.
- (c) Open Jaw Trips:
- (i) Normal Fares
Travel comprising only two International fare components with a surface break(s) that, unless otherwise specified in a normal fare Rule, may be between any two points/countries in the sub-area of unit origin and/or within the same/different IATA area(s) at destination, for which the fare is assessed as a single pricing unit using half round trip fares, provided that except for travel between Areas 2 and 3, and except for travel between Area 1 and Area 3 via the Pacific, and except for travel between Area 1 and Area 3 via the Atlantic, travel must be via fares of the same global indicators to and from points of the surface break, and when the surface break is at the destination and the open jaw points are in different sub-areas or IATA Areas, the open jaw mileage must be shorter than the accumulated TPM of the longer fare component.
Note: For purposes of this provision, the following are considered tariff sub-areas:
 - Area 1: North America, Central America (including Panama), South America (excluding Panama), IATA Caribbean.
 - Area 2: IATA Europe, Africa, Middle East.
 - Area 3: Asia (excluding Southwest Pacific), Southwest Pacific.
 - (ii) Special Fares
Unless otherwise stated in the

applicable fare rule, the fare for an open jaw special fare trip is the sum of 50 percent of the applicable round trip fare for each leg of the open jaw.

Exception: Between Bahamas, Bermuda, Cayman Islands, Cuba, Dominican Republic, Haiti, Jamaica, Turks and Caicos Islands and the rest of IATA Caribbean sub-area: No special fare open jaws are permitted.

- (d) Unless otherwise stated in an applicable fare rule, 50 percent of a round trip fare governed by one rule must not be combined with 50 percent of another round trip fare governed by a different rule in order to construct a different type of round or circle trip fare.
- (e) Special round trip fares must not be used to construct Around-The-World fares, nor 50 percent of a round or circle trip special fare may be used to construct another type of round or circle trip special fare.
- (f) When constructing open jaw or circle trip special fares involving fares with different conditions, the most restrictive conditions as described in Rule (2) Permitted Combination (9) shall govern the entire journey.
- (g) Unless otherwise stated in an applicable fare rule, when combining special fares with other types of fares, the restrictive provisions of the special fare apply only to the special fare and not to any other fare when used in end-on-end combinations.
- (h) Subjourney combinations (Applicable to tickets issued by and validated on AA.) A journey may be broken within a tariff sub-area, as defined in (D)(1)(c)(i)(ii)(bbb) of this rule, to form independent subjourneys, the total of which may be lower than a through fare for the same class of service. This provision applies to one way, round trip, and circle trip journeys. Additionally, for such combinations, fare rules for all fares used in a subjourney shall be validated to such subjourney separately and independently of any other subjourney, as if such subjourney were ticketed separately, provided that the combinations of subjourneys is permitted by end-on-end provisions of the fares combined. One way subjourneys may be combined end-on-end with round/circle trip subjourneys and vice versa.
- (i) Combination with other fares may not be used to extend the period of validity.

- (j) Partly via Air and Partly via Sea
(Applicable to round trip and Around-The-World-Fares) When tickets are purchased prior to commencement of carriage for a round trip or around the world journey for combined air and sea travel, the air fare for each one way section of the air journey is 50 percent of the all year round trip fare published in this tariff and applicable between the points and via the class of service charged. A break in the round trip is permitted to allow passengers to make independent provisions for carriage by any means of transportation between airports and adjacent seaports.
- (2) Combination of Arbitraries with International Fares
When combining arbitraries with international fares, the fare for such transportation will be established by combining the published arbitrary and the published international fare for the fare class applicable to the transportation. A passenger may be routed via any gateway city regardless of the point(s) used in establishing the fare, subject to the provisions of (C) above.
- (3) Surface Transportation Segments
- (a) Normal Fares
For tickets containing only normal fares - If the mileage for an international surface break is:
- (i) Greater than the total TPMs over the routing traveled from the point origin to the point of commencement of the surface break, and
- (ii) The surface break is not included in the through fare, the journey from the point of origin up to the surface break must be ticketed separately.
- Exception: This does not apply to permissible surface sectors in (f) below.
- (b) Surface Transportation Due to Lack of Reasonably Direct Air Service
When no reasonably direct scheduled air service is available between two points of a circle trip, a break in the circle trip may be traveled by any other means of transportation without changing the status of the circle trip.
- (c) For Tickets Containing Both Air and Surface Transportation Segments.
When a journey by air is interrupted by the use of surface transportation between points not listed in sub-paragraph (f) below, the fare must be constructed by whichever of the following methods produces the lowest fare:
- (i) The sum of two or more applicable one way fares.

- (ii) A one way, round or circle trip fare covering all portions of the itinerary whether travelled by air or surface transportation.
- (iii) A round or circle trip fare for that portion of the itinerary which meets the requirements of a round or circle trip, plus one or more one way fares for those portions not included in the round or circle trip fare.
- (d) A surface break may occur on a routing fare provided both points of the surface break are on the specified routing.
- (e) A through fare may not be charged over a surface sector at the point of origin of an itinerary.
- (f) Permissible Surface Transportation Sectors
 - (i) When a fare component includes surface transportation between the following pairs of intermediate points, the mileage between such intermediate points is disregarded when computing sector mileages.
 - (ii) The exclusion of these mileages will not affect the status of a round or circle trip.
 - (iii) These sectors must not be used as points of origin/destination.

(4) Mileage System

The maximum permitted mileage (MPM) published

in connection with a fare governs the maximum distance a passenger is allowed to travel en route between two particular points at the direct through one way or half round trip fare. In order to determine whether a desired routing between two points is permissible at the through one way or half round trip fare, the following procedures shall apply.

- (a) Determine the applicable MPM between the terminal points of the fare.
- (b) Add the ticketed point mileages (TPM) between the cities on the itinerary, including all intermediate ticketed points. Intermediate points of through flights are not considered when computing mileages. The ticketed point mileages to be used to determine the actual mileage for the itinerary are those published in the International Air Transport Association Ticketed Point Mileage Manual.

Note: "Ticketed Points" are those points which would be shown in the "good for passage" section of a passenger ticket. Two flight numbers or two carriers (such as an interchange flight) are not permitted on the flight coupon. If, on a through fare, a portion of the journey is to be travelled by means of surface transportation, the direct or lowest combination of currently published ticketed point mileages is to be used, whether or not air services exist over such sectors, unless noted in Permissible Surface Transportation exception cities (3)(f) above.

- (c) Compare the total TPM's to the applicable MPM permitted at the direct fare between the two points. If the total TPM's are equal to or less than the MPM, the itinerary is allowed at the published direct fare.
- (d) If the total TPM's for a fare component exceed the MPM published in connection with a fare, a surcharge becomes necessary. Where the sum of the ticketed point mileages for the routing option is greater than the maximum permitted mileage, the direct route fare shall be surcharged in accordance with the following formula:

Divide the sum of the TPMs by the MPM mileage. Then the fare shall be sur-charged by:
 if the result is:
 Over 1.00 but less than or equal to 1.05 5 percent
 Over 1.05 but less than or equal to 1.10 10 percent
 Over 1.10 but less than or equal to 1.15 15 percent
 Over 1.15 but less than or equal to 1.20 20 percent
 Over 1.20 but less than or equal to 1.25 25 percent

- (e) If the sum total of TPM's exceeds the adjusted MPM shown at 25 percent in the Excess Mileage Percentage Table, the applicable fare will be the combination of two or more fares along the desired routing which produces the lowest fare.
- (f) Extra Mileage allowances are permitted in certain markets in addition to the published MPM's; however, only one extra mileage allowance is permitted in connection with a one way or half round trip fare component. Extra mileage allowances apply only in connection with the through fares between the points or areas specified, and apply only when shown on the ticket as ticketed points. The extra mileage allowance is deducted from the sum total of the TPM's before making the comparison between this total and the applicable MPM's. EMA means extra mileage allowance.

- Note 9: All travel within the US/Canada must be via the services of AS.
- (g) Special provisions for Brazil with regard to fare components which originate or terminate in Rio De Janeiro or Sao Paulo:
- Note: This provision does not apply when both RIO and SAO are included in the same fare component.
- (i) If a fare to or from Rio de Janeiro falls within the MPM, and the fare for the same route to or from Sao Paulo exceeds the MPM, the fare to and from the latter point need not be surcharged.
 - (ii) If a fare to or from Sao Paulo falls within the MPM, and the fare for the same route to or from Rio de Janeiro exceeds the MPM, the fare to and from the latter point need not be surcharged.
 - (iii) If a fare to or from Rio de Janeiro must be surcharged, the fare for the same routing to or

- from Sao Paulo need not take a higher surcharge (or vice versa).
- (iv) This rule applies only to fare components within Area 1.
- (h) (Applicable to transatlantic fare components between South America and Europe/Middle East/Area 3)
When travel is on direct service from a point in South America and CHI/CLT/DFW/MIA/NYC/PHL to a point in Europe/Middle East/Area 3, the mileage for these two sectors shall be the TPM between the last point of departure in South America directly to the first point of arrival in Europe/Middle East/Area 3 or vice versa. In addition, this provision will apply when BOS/CHI/CLT/NYC/PHL is the gateway to/from a point in Europe/Middle East/Area 3 and MIA/DFW is the gateway to/from a point in South America, and if travel is via AA single plane service between BOS/CHI/CLT/NYC/PHL and MIA/DFW.
- (i) (Applicable to fare components between the Canary Islands and Canada/Mexico/U. S. A. via Madrid) If a mileage surcharge is required, the surcharge to the direct fare shall be the surcharge applicable to/from Madrid only if resulting in a lower percentage than the normal surcharge to the direct fare to/from the Canary Islands.
- (j) Limitations on Indirect Travel
- (i) Fare Component Limitation
The one country rule for Canada and USA and for Denmark, Norway, Sweden does not apply to this rule.
- (ii) General Limitation
A fare component may not include more than:
- (aa) One departure from origin, or
(bb) One arrival at destination, or
(cc) One stopover at any one ticketed point.
- (iii) Additional Limitations
- (aa) (Applicable to fare components within Area 1) An intermediate ticketed point may not be included more than once in any one way or half round trip fare component, whether or not a stopover is made at such point. A separate side trip fare must be charged and added to the through fare.
- (bb) Applicable to fare components between points in Area 1 and Area 3 via the Pacific, and to fare components between points in Area 2 and Area 3 via the Atlantic and

- Pacific, including around-the-world journeys. Unless prohibited by individual fare rule or routing, a ticketed point may be transited twice, provided only one stopover is made at such point and AA is the sole carrier on the entire fare component.
- (cc) Unless otherwise stated in the applicable fare rule(s), a ticket may not include more than four international ticketed point arrivals or four international ticketed point departures in any single country including arrival and departure surface sector points.
- (dd) For tickets originating in Area 1:
No fare component within Area 1 may include more than one international departure and arrival at any ticketed point in the country where travel originates on the ticket.
- (ee) Except for Journeys wholly within South America
For a pricing unit originating in Brazil, a fare component from a point in Brazil must not include more than 2 domestic sectors in Brazil.
Example: FLN X/CWB-IGU-X/SAO-LON:
A through fare FLN-LON is not permitted. POA-RIO-SSA-LIS at a through fare POS-LIS is permitted.
- (ff) Fare components to/from Azores are not applicable for routings which include travel within Azores.
- (gg) For tickets originating in Germany, a fare component to/from a point in Germany may not include more than two domestic flights in Germany.
- (hh) The mileage system does not apply to domestic travel within Madagascar in connection with international travel.
- (ii) The mileage system does not apply to domestic travel within Myanmar in connection with international travel.
- (jj) VN domestic sectors within Viet Nam may not be included in international through fares. Full domestic local fare(s) are to be collected.
- (k) Permitted Specified Routings

The specified routings mentioned below shall be permitted at the direct fare, provided that the fare between the points named is applied, and that the route is via the points specified below, and no additional point(s) is (are) added.

(5) Travel Via a Higher-Rated Intermediate Point
 (a) Normal Fares

(i) The through fare between origin and destination must not be lower than the applicable fare, including validation of seasons, blackouts, day-of-week application, transfers, stopovers, specific flight application, specified routing, and limitation of indirect travel;

- (aa) from the point of origin to any intermediate stopover point; or
- (bb) from any intermediate stopover point to the destination; or
- (cc) between any two intermediate stopover points along the routing of travel.

Exception 1: When journey originates in West Africa, higher intermediate points must be checked from all en route ticketed points in West Africa.

Exception 2: See chart in (d) below for exceptions.

(ii) When the normal fare for a fare component of an itinerary is lower than an intermediate point normal fare, the fare from origin to destination must be raised to the amount of such higher fare. All conditions of the normal fare between origin and destination shall apply.

Exception: See chart in (d) below for exceptions.

(iii) If travel from the origin to the destination of the fare component exceeds the published MPM, the appropriate excess mileage surcharge must be applied to the higher intermediate fare.

(iv) When comparing normal fares of the same class of service, the lowest qualifying mileage or routing fare should be used

for comparison (See (F) below).

- (aa) A first class fare is compared with a first class fare; if no first class fare, compare with intermediate class fare (or next lower class fare).
- (bb) An intermediate class fare is compared with an intermediate class fare; if no intermediate class fare, compare with the highest economy class fare.
- (cc) An economy class fare is compared with an economy class fare, if no economy class fare, use next higher fare.

Note: For the purpose of this provision, inventory is not considered.

- (v) When comparing normal fares, the comparison will be made in the same direction as the fare component.
- (b) Special Fares
If in any routing otherwise permissible at the direct route special fare there is a direct route special fare(s) of the same class of service from:
 - (i) Fare component origin to each intermediate stopover point,
 - (ii) Each intermediate stopover point to the fare component destination.
 - (aa) The special fare of the fare component shall not be less than the lower/lowest applicable special fare of the same fare type.
 - (bb) If there is no matching applicable special fare of the same type, the special fare of the fare component shall not be any less than the lower/lowest applicable special fare within the same fare type group.
 - (cc) If there is no applicable special fare of the same type, the special fare of the fare component shall not be less than the lower/lowest next applicable fare within the next higher fare type group. Continue to the next group only if there is no applicable fare found.
 - (dd) If there is no applicable special fare within any higher fare type group, the direct route special fare surcharged if necessary should be used.

Note 1: The conditions which define applicable special fares are day of week, seasonality (including blackout dates), flight application, stopovers,

transfer and limitations of indirect travel, and routing validation.

Note 2: Advance purchase, minimum/maximum stay, and inventory is not considered in determining which intermediate fares are applicable.

Note 3: If there is more than one applicable special fare of the type needed, the lowest of such fares apply.

Note 4: When checking a one-way special fare, only one-way special fares may be used for comparison.

(ee) All conditions of the through special fare from the origin to the destination shall apply.

Exception 1: When journey originates in West Africa, higher intermediate points must be checked from all en route ticketed points in West Africa.

Exception 2: See chart in (d) below for exceptions.

(c) Fare Type Groups defined from lowest to highest.

- (f) Special Provisions/No Applicable Fares/Unpublished Intermediate Point Fares/Side Trip
- (i) When a fare component is routed via an intermediate point for which no applicable fare exists due to routing/stopover/transfer restrictions, ignore the restrictive provisions and select the fare most applicable to the route of travel.
 - (ii) When no applicable fare exists due to limitations of indirect travel; ignore the restriction of indirect travel between the points for which the higher intermediate fare check applies.
 - (iii) When a fare component includes an intermediate ticketed point for which no through fare is published, the HIP check will not apply.
 - (iv) For the purpose of the higher intermediate fare check, when both the origin and destination points of a side trip are shown as connections, a stopover will be considered to have been taken at such point(s) if more than 24 hours elapses between the arrival at the point of origin of the side trip and the departure from the termination point of the side trip.
- (6) Construction of Fares via Different Classes of Service
(Applicable to normal fare travel)
- (a) When travel is via different classes of service, the fare must not be higher than the lowest fare resulting from the following:
 - (i) The combination of sector fares for the class(es) of service used.
 - (ii) Within each fare component, the applicable through fare for the lowest class of service, plus a differential in the direction of the fare component for each sector where a higher class of service is used; such differential being the difference between the applicable one way or half round trip fare (surcharged, if necessary) for the lowest class of service charged and the corresponding one way or half round trip fare for the higher class fare of the same type.
Exception 1: Applicable to fare

- components between Area 1 - Area 2/Area 3. When economy class service is used and the transatlantic segment is flown in intermediate class, a differential between economy and intermediate class is not permitted.
- Exception 2: Applicable to fare components between Area 1 - Area 2/Area 3. When the transatlantic segment is flown in first class and other segments are in a lower class, differential construction is not permitted.
- Exception 3: Applicable to fare components between Area 1-Area 3. When Economy Class Service is used and the transpacific segment is flown in intermediate class, a differential between economy and intermediate class is not permitted.
- Exception 4: Applicable to fare components between Area 1-Area 3. When the transpacific segment is flown in first class and other segments are in a lower class, differential construction is not permitted.
- Exception 5: Applicable to fare components within Area 1. When Economy Class Service is used and the segment between the United States and South America (excluding Panama) is flown in intermediate class, a differential between economy and intermediate class is not permitted.
- Exception 6: Applicable to fare components within Area 1. When the segment between the United States and South America (excluding Panama) is flown in first class and other segments are in a lower class,

- differential construction
is not permitted.
- (iii) The through fare for the highest class of service used.
 - (iv) The through fare for a higher class of service than the lowest class used, plus a differential in the direction of the fare component for each sector where the highest class of service is used.
 - Example: NYC-Y-LON-F-ATH
 - Charge: NYC-ATH, C
 - Differential: LON-ATH, F
 - Minus: LON-ATH, C
 - (v) For the purpose of this provision, fares are published in the following descending order of classes of service.
 - (aa) First Class
 - (bb) Intermediate Class
 - (cc) Economy Class
 - (b) For all first and intermediate class fares: Unless otherwise stated in a fare rule, when paying through AA intermediate class fares, passengers are permitted to sit in first class on AA flights within Area 1 not offering intermediate class seating.
 - (c) It is permissible to calculate a differential over segments not booked in a higher class provided the following requirements are met.
 - (i) At least one segment of the through fare component must be booked in the lower class of service applicable to the fare being charged.
 - (ii) The resulting differential must be lower than the differential for the segment(s) where a higher class is used or the combination of differentials when applicable.
 - (iii) The differential must not be calculated beyond the terminal points (origin and destination) of the through component.
 - (d) The application of differential construction must not be used to circumvent any stopover or transfer restrictions applicable to the through fare for the lowest class of service charged.
 - (e) Differentials are calculated using fares of the same type. For this purpose, "fare types" are defined as either:
 - (i) Unrestricted (e.g. compare Business Unrestricted to Economy Unrestricted)
 - (ii) Restricted (e.g. compare First Restricted to Economy Restricted)

Exception: In the absence of a lower class fare for the sector for which a differential is charged, use the applicable fare for the next lower class.

Note: There may be more than one fare with the same fare type for a class of service as defined in 6(e)(i) and (ii) above. If more than one applicable fare exist for the same fare type within the same class of service which results in more than one differential calculation, the one providing the lowest result must be used. If a calculation using fares of the same type is not possible, differing fare types must be used. When multiple calculations are possible, a zero differential is not permitted as the lowest result of such calculations. ATPCO fare type codes (e.g. ER/ERS) are not used to further differential fares of the same type.

- (7) **Around The World Fares**
Around-the-World fares are circle trip fares which are applicable to continuous eastbound or westbound travel commencing from and returning to the same point via both the Atlantic and Pacific Oceans.
- (a) An Around-the-World fare is constructed by using that particular combination of two or more half round trip fares which produces the lowest total fare from the point of origin and return to the same point.
 - (b) Unless provided in specified fare rules, only normal fares may be used to construct an Around-the-World fare.
- (8) **Minimum Fares**
Having established the international fare for open jaw, circle trip, or Around-the-World journey in accordance with normal rules, including the higher intermediate point rule and mileage surcharge, where applicable, a separate calculation ignoring mileage surcharge must be made. When this separate calculation results in a higher fare, such higher fare must be charged. Separate fares and separate minimum checks are charged for side trips. For the purpose of minimum fare checks, when both the origin and destination of a side trip are shown as connections, a stopover will be considered to have been taken at such point(s) if more than 24 hours elapses between the arrival at the point of origin of the side trip and the departure from the termination point of the side trip.
- (a)

- (b) Circle Trip Minimum
The fare for a circle trip must not be less than the highest direct round trip fare from the point of origin to all stopover points on the circle trip for the lowest class of service charged via the applicable global indicator. When fares charged from the point of origin to stopover points differ according to carrier(s)/global indicators, the fare to be used for the check must be the lower of such carrier(s)/global indicator fares. Ignore inventory/routing/stopover restrictions/transfer restrictions when determining the direct fare.
- Exception 1: The circle trip minimum check is not applied to a point(s) on the journey permitted to be disregarded by the higher intermediate point rule.
- Exception 2: The circle trip minimum check is not applied to an itinerary or sub-journey consisting entirely of special fares.
- Exception 3: The circle trip minimum check is not applied if an itinerary consists entirely of end-on-end round trips.
- Exception 4: The circle trip minimum check is not applied to a sub-journey that contains a mixture of normal and special fares.
- Exception 5: The circle trip minimum check is not applied a connecting point(s) that is a fare break point(s) on a journey.
- Exception 6: The circle trip minimum check is not applied to an itinerary containing a government/military fare.
- (c) Around-the-World Minimum
(i) After an Around-the-World fare has been constructed, all stopover points on the routing must be checked to determine whether any round trip fares exist from the point of origin to any stopover points on the routing which are higher than the constructed fare. The fare for an Around-the-World journey must not be less than the highest direct normal round trip fare applicable to the class of service charged from the point of origin to any stopover point on the route of travel to any stopover point on the route of travel. However, any point(s) permitted to be disregarded by the higher intermediate point rule need

not be checked for the purpose of Around-the-World minimum fare check. In general, transatlantic round trip fares from the point of origin to other points on the routing differ from the corresponding transpacific round trip fares from the point of origin to the same points. For the purpose of this rule, transatlantic round trip fares must be compared with transpacific round trip fares from point of origin to each stopover point on the routing; and the lower of the two will be considered the direct fare. Separate fares are assessed for side trips.

- (ii) One Class of Service
The fare for an Around-the-World journey traveled in one class of service must not be less than the highest direct round trip fare from the point of origin to any stopover point on the routing.
- (iii) Different Classes of Services
The fare for an Around-the-World journey involving different classes of service must not be less than the highest direct round trip fare for the lowest class of service charged from the point of origin to any stopover point on the routing, plus applicable differentials for sectors traveled in higher classes of service.

Rule 135 Stopovers

- (A) Stopovers will be permitted under the following conditions:
- (1) Stopovers must be arranged with AA in advance and specified on the ticket.
 - (2) Stopovers will be permitted at any point which can be included in an itinerary constructed either by the use of a mileage routing or as specified in the published routing, unless such stopover is prohibited by the AA'S tariff or government regulations.
 - (3) For travel between Canada and the U.S./Puerto Rico/Virgin Islands, a stopover, as used herein, will occur when a passenger arrives at an intermediate or junction transfer point on a flight and fails to depart from such intermediate or junction transfer point on:
 - (a) The first flight on which space is available; or
 - (b) The flight that will provide for the passenger's earliest arrival at intermediate or junction transfer point(s) or destination point, via the carrier and class of service as shown on the passenger's ticket. Provided, however that in no event will a stopover occur when the passenger departs from the intermediate or junction transfer point on a flight shown in the carrier's official general schedules and/or service patterns as departing within four hours after his arrival at such point.
 - (4) Stopover provisions for normal/special fares (applicable to all fares for which stopovers other than at the point of turnaround are prohibited or restricted in number.) When travel at a through fare is interrupted by surface travel, either at intermediate points or at the point of turnaround, the points of disembarkation and reembarkation of the interrupted portion of travel will be considered together as one stopover or the one point of turnaround.
 - (5) Only one stopover is permitted at any single point on the itinerary of a journey travelled at a one way or half a round trip fare. The origin and destination or point of turnaround, as the case may be, may not be included in such itinerary more than once, regardless as to whether or not a stopover is made at such point.
- (B) Except as otherwise provided, stopovers will be

permitted free of charge at all intermediate points on routings applicable to fares between points in the U.S.A./Canada on the one hand and points outside the U.S.A./Canada on the other hand.

Rule 140 Routings

- (A) Application
fares governed by this tariff apply only via the routings specified in connection with such fares.
- (B) Routings
 - (1) Routings are applicable in either direction.
 - (2) Any routing published between two points shall apply via any nonstop or local service of AA provided carriage is in a generally continuous direction.
 - (3) If more than one routing is applicable via the same fare, the passenger, prior to the issuance of the ticket, may specify the routing. If no routing is specified by the passenger, the carrier will determine the routing.

Combination of local currency fares

To combine two or more local currency fares, convert all local currency fares into the currency of the country of commencement of transportation.

Step 1: (a) Establish the NUC amount for each local currency fare by dividing the local currency fare by the applicable IATA Rate of Exchange (ROE) shown in the Currency Conversion Table below for the country in which the currency is denominated.

(b) Calculate the resultant amount to two decimal places, ignoring any further decimal places.

Step 2: Add the resultant NUC amounts for the sectors involved.

Step 3: (a) Established the through local currency

fare by multiplying the total NUC amounts (derived from Steps 1, 2, and 3 above) by the IATA Rate of Exchange (ROE) shown in the currency conversion table below for the country of commencement of travel.

- (b) Calculate the resultant amount of one decimal place beyond the number of decimal places shown next to the local currency in the conversion table below, ignoring any further decimal places.
- (c) Round up to the next higher rounding unit shown next to the local currency in the currency conversion table, unless otherwise indicated.

Exception: When an international ticket is comprised of all domestic fare components, but within different countries, the provisions outlines above shall apply.

Other Charges

Other charges shall be separately converted to the currency of the country of sale using the Bankers' Selling Rate using the rounding units shown next to other charges in the currency conversion table.

MCOs for unspecified transportation and PTAs.

MCOs for unspecified transportation and PTAs when honored for payment of Air transportation shall be subject to the provisions of Rule 75 (Currency of Payment). The country of payment of the PTA or MCO shall be considered the country of original issue and determine construction Rules to apply.

Any mileage not used by the last date of term AAirpasses will be forfeited and will have no refund value associated with it. If during any anniversary year the AAirpass holder shall exceed the mileage allowed for that year, such excess mileage will be billed, pursuant to contract, at the then prevailing rate, as specified in (g) below. Failure to pay for such excess mileage will result in suspension of AAirpass privileges until such time excess miles are paid for.

(E) Mileage usage

Mileage flown by holder, and when applicable by holder and companion, will be deducted from the annual mileage allotted to his or her AAirpass (except for unlimited lifetime AAirpass holders) as follows:

- (1) Mileage on a through flight (i.e., one with at least one stop between origin and destination points, but not requiring a change of aircraft) or on a nonstop flight, will equal nonstop mileage between origin and destination points.

 - (a) The trip consists of no more than three separate flight segments; and
 - (b) Scheduled connections between consecutive segments occur within 6 hours (24 hours for connections to or from Hawaii, San Juan, the U.S. Virgin Islands, some international flights), and

(G) Excess mileage charges

If AAirpass mileage, including premium for first class travel and business class, flown by holder (or his or her companion(s)) in any anniversary year (as determined by anniversary dates) exceeds holder's mileage allotment for that year (including additional mileage and unused mileage from previous years), holder hereby promises to pay AA for such mileage upon receipt

of invoice therefor. Such excess mileage charges will be made at a rate per mile to be fixed by AA from time to time. For travel during any calendar month period, this rate shall be the rate specified in holder's statement for the preceding month. The rate for 5 year term AAirpasses and regular lifetime AAirpasses shall be based on the average full fare coach rate per mile on AA's then current route system. By using the AAirpass card to incur excess mileage, holder consents and agrees to such charges.

Excess miles flown in first class/business class will be billed at the premium mileage rate as set forth in (c)(2)(b) above.

(H) Work stoppage

In the event of a strike or work stoppage that requires the total suspension of AA flights, the following provisions will apply:

- (1) Beginning with the 8th day of any such strike, and for each succeeding day, 100 additional miles of future air travel will be credited to holder's currently available mileage upon termination of such strike; and
- (2) For each full month (i.e. 30 days) such strike continues, holder's anniversary date shall be extended to the first day of the month following the anniversary date, and the anniversary date as so extended shall become the anniversary date for the purposes of determining annual mileage accruals and AAirpass expiration.

(I) Usage by card holders only

For purchaser's protection, holder's signature will be required at check-in for a flight. Additional identification (such as driver's license or credit card) may, at AA's discretion, be required. AAirpass is valid for use only by the individual whose name appears on the card. AAirpass cards and purchaser's rights under this rule are not transferable, and coupons used in conjunction with AAirpass travel have no cash value. Companion travel may not be sold or bartered under any circumstances.

(J) Travel

AAirpass entitles the holder to one seat per flight (two seats per flight if a qualified lifetime AAirpass 5 year companion term AAirpass or leisure lifetime companion AAirpass holder travels with a companion) and such travel is subject to AA's rules tariff as in effect at the time of travel and any other general terms and conditions applicable to travel on AA which may subsequently replace or supplement such tariff. AAirpass is valid only for travel on AA and American Eagle. Travel is authorized anywhere on AA's system, except certain international destinations specified by AA.

(K) Fraudulent usage

If AA determines that an AAirpass has been fraudulently used, AA reserves the right to revoke the AAirpass and all privileges associated with it. Purchaser will

thereupon forfeit all rights to such AAirpass, without refund.

(L) Force majeure

Except as provided above, AA shall not be liable for delays in performance hereunder resulting from causes beyond its reasonable control.

(M) Payment

If purchaser fails to make payment under the terms of a fully executed contract, a processing fee of USD 250.00 will be assessed by AA.

(N) Refunds

Refunds of AAirpasses will be made only in accordance with the provisions set forth in the contract between AA and the purchaser of the AAirpass.

(1) AA reserves the right to terminate this tariff and refund the purchase price of any AAirpass less charges for mileage actually flown, dependent on plan purchase, except for unlimited mileage AAirpasses, which will be refunded in accordance with (n)(2)(a) below, of this agreement.

(2) Upon receipt of a refund request within 90 days, American shall perform the following calculations pertaining to holder's AAirpass and refund the lesser amount of a or b (may be \$0), after deducting sums due for excess mileage flown:

(a) Remaining full months before expiration

Total AAirpass months purchased x purchase price * equals a

(b) remaining mileage*

Total mileage purchased* x purchase price * equals B
(*including additional mileage)

(3) For purposes of applying such formulas to refund on lifetime AAirpasses, those AAirpasses shall be determined to have the following terms: regular lifetime AAirpass - 120 months (10 years): unlimited mileage lifetime AAirpass - 200 months. to determine the mileage purchased with any regular lifetime AAirpass, multiply the annual mileage allowance by the number of months given in the preceding sentence, and add any additional mileage purchased. The second formula above is inapplicable to refunds on unlimited mileage lifetime AAirpasses or unlimited 5 year term AAirpasses.

(O) (The provisions of this paragraph do not apply to leisure lifetime, regular lifetime or unlimited lifetime AAirpasses.) Where the purchaser of an AAirpass is a corporation which has designated in the contract between AA and the purchaser that the holder of the AAirpass will be an employee of that corporation, such corporation may redesignate the employee of such corporation who will be the holder of the AAirpass in accordance with the terms of the contract between AA and the purchaser.
